---

Hello Everybody,

108 Excavating has submitted a change order that I would like to sign and confirm their work commencement on Tuesday, Sept. 17. The additional money is \$2,631.80 or \$292.42 per property owner.

The reasons behind the change order are additions to the scope of work:

- Inlet sections and straps on the entrances to the three culverts
- Labor for the above
- Grubbing the weeds on both sides of the existing asphalt road in order to spread and compact the pulverized asphalt and end up with a 12' wide section of road all the way through.
- Labor for the above
- Install a shallow ditch from Jack Pastor's drive entrance to the existing ditch in front of Kelly's on the West side of the road. This will prevent the drainage from going over the asphalt road.

I plan to send this change order in approved. See attached documents.

So with Drainage Work and pulverizing and overlaying 3" of new asphalt the total cost will be:

Drainage	=	\$16,743.85	Does not include Carve-Out for D. Duns 10'
culvert extension with cover.			
Change Order	=	\$2,631.80	
Pulverizing and 3" overlay	=	<u>\$78,116.00</u>	
-			
TOTAL	=	\$97,491.65	
Per property owner (9 in total)		<b><u>\$10,832.41</u></b>
