interests

experience

Managed a call center which maintained staff and faculty computers

Provided phone support to students and employees for the Mathematics, Natural Sciences and Engineering schools on the Northern Arizona University campus

Designed and wired the student-run radio station KJAK on NAU campus

Built a fully-featured website based on Drupal technology, complete with "Now Playing" and RSS show feeds

Managed a broad set of audio/visual equipment such as DAs, voice processors, and broadcasting automation servers

Implemented visual styles and created full back-end content management systems for a start-up web development company

Created libraries for authenticating credit card transactions through the PayPal API

Configured and added functionality to robust Customer Relation Managers such as SugarCRM

Client list includes NYbeauty.com, Jambonie.com, AZradiologyRN.net, and BotnickChevrolet.com.

Managed server equipment and repaired/debugged departmental computers

Increased office efficiency and productivity by keeping track of software version information, rewiring equipment, setting up new equipment, and researching new IT technology

Resolved computer problems for students on campus

Provided technical services such as spyware/malware removal, network access requirements, hardware compatibility and system upgrades

Resolved software, hardware, and network access problems daily via phone support
