Progress Report

▶ This Document

This document describes the progress made in the last 2 weeks converning the development of the AZMLA web-store.

▶ Recent Progress

- CSS now validates/is fully valid.

- Tabs now work correctly.

- Various theme bug fixes, problems such as stray lines and browser compatibility issues worked on.

- Created subversion repository for the project (login information to follow)

- Catalog block is fully functional with narrowing criteria and removing criteria

- Catalog grid supports multiple categories from the vocabulary

- Card entry module has full support for auto complete

- Card entry module fully creates product nodes

- Card entry module is uses templates to re-arrange the fields

► TODO

- User profiles are created for AZMLA board members to post information about themselves

- Calendar is linked to Google Calendars and imports dates of events put on by the AZMLA
